THE ARMORED VEHICLE, SERVING IN IRAQ, WAS HIT WITH AN IED THAT BLASTED AND BURNED EVERYTHING BUT THE MEN INSIDE. THEY GOT OUT SAFELY, BUT MUCH OF THEIR GEAR WAS DESTROYED - EXCEPT FOR THESE STEINER MILITARY BINOCULARS. THEY CAME OUT CHARRED AND MISSHAPEN, ARMOR AND CHASSIS DISFIGURED BY FIRE AND IMPACT - BUT STILL WORKING, LENS AND PRISM SYSTEMS INTACT. THE MEN WERE SUITABLY IMPRESSED, BUT NOT REALLY SURPRISED. STEINER OPTICS ARE WORLD-RENOWNED FOR FEROCIOUS TOUGHNESS. LIKE THOSE WHO USE THEM, THEY MAY TAKE THE OCCASIONAL BEATING. BUT THEY ARE NEVER DEFEATED.

A large, heavily corroded metal object, possibly a sword hilt or a decorative element, showing significant rust and structural damage. The object is dark brown and black with extensive rust and pitting. It has a central vertical section and two large, rounded, flared sections on either side. The surface is rough and uneven, with some areas showing a ribbed texture. The object is set against a background that includes a map of Afghanistan and a list of locations: Herat, Kandahar, Jalalabad, Kabul, Ghazni, and Shindand.

BLASTED AND BURNED IN IRAQ

BATTLE-PROVEN STEINER LENSES AND PRISMS ARE BUILT INTO UNBREAKABLE, RUBBER-ARMORED MAKROLON® POLYCARBONATE BINOCULAR HOUSINGS, AND SEAMLESS, HIGH-STRENGTH ALLOY SCOPE TUBES. THEN PURGED, SEALED AND SHIELDED TO BE FOG-PROOF, WATERPROOF, IMPACT RESISTANT AND IMMUNE TO EXTREMES OF EVERY KIND. NOW, AND FOR LIFETIMES TO COME.

BINOCULARS REST COMFORTABLY IN THE PALMS, WITH RUBBERIZED HOUSINGS AND HAND-FRIENDLY RIDGES, CURVES AND PADS FOR INTUITIVE USE. SCOPES HAVE ADJUSTABLE ILLUMINATION, OVERSIZED KNOBS, AND POSITIVE SOUND/FEEL FEEDBACK FOR EASY SETTINGS AND REPEATABLE ACCURACY. EVERY DETAIL IS ERGONOMICALLY PERFECT. BECAUSE THE WORLD NEVER IS.

FOR OVER 65 YEARS, STEINER OPTIK IN BAYREUTH, GERMANY, HAS SET THE BAR IN PREMIUM LONG-RANGE OPTICS. OVER 460 EXACTING STEPS ENSURE RIGOROUS QUALITY THROUGHOUT DESIGN AND MANUFACTURE. RELENTLESS INNOVATION CREATES TECHNOLOGIES LIKE THE N₂ INJECTION™ SYSTEM, LASER PROTECTION FILTERS, STEINER NANO-PROTECTION® AND DIAMOND NIGHT™ LENS COATINGS. CONSTANT USER FEEDBACK, FROM BATTLEFIELDS TO BIRDING, KEEPS PERFORMANCE STATE-OF-ART. NO OPTIC WILL SERVE YOU BETTER.

Steiner grinds and polishes its own premium lenses and BaK4 prisms, then multi-coats all air-to-glass surfaces with proprietary coatings for unmatched brightness and clarity.

After more than 460 high-precision manufacturing and inspection steps, finished multi-coated lenses are assembled into unbreakable Makrolon® polycarbonate binocular housings.

Steiner advanced lens coatings, applied to every air/glass surface, have evolved to enhance light so your eyes perceive more contrast and brighter detail, even in low light conditions.

YOUR QUARRY DIDN'T SURVIVE THE HUNT

ONCE YOU'RE AFTER THAT TROPHY, NOTHING CAN HOLD YOU BACK. SO IN ADDITION TO PROVIDING THE DEADLIEST IMAGE YOU CAN GET, STEINER OPTICS SURVIVE THE WORST CONDITIONS YOU CAN FACE. LOW LIGHT OR HEAVY GLARE, HIGH WATER TO DEEP COLD, ROCK SLAMS AND GRIT STORMS, NO MATTER. THE VIEW IS ALWAYS CRYSTAL CLEAR AND DEAD CERTAIN. EVEN AFTER COUNTLESS MONSTER-OBSSESSED PURSUITS, STEINER OPTICS ARE EAGER FOR MORE AND READY TO GO. NOT UNLIKE YOURSELF.

BUT YOUR OPTICS WILL.

M5Xi SERIES LRF SERIES MILITARY BINOCULAR SERIES

PORRO PRISM RUGGED.

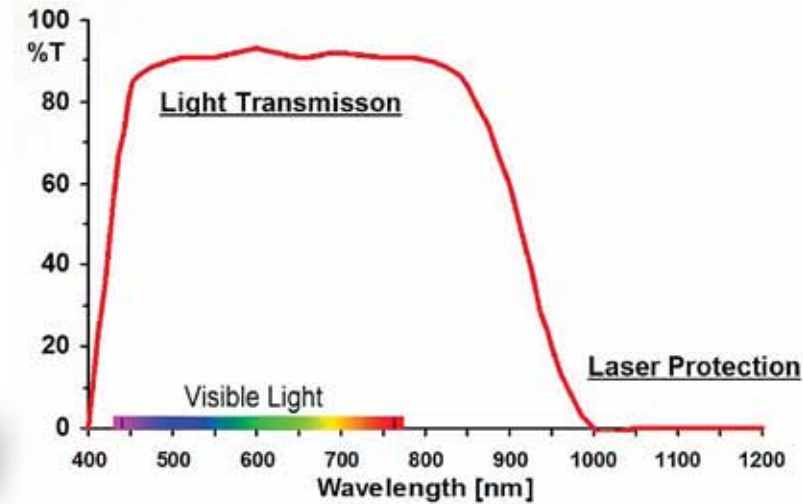

STEINER PORRO PRISM BINOCULARS ARE EXTREMELY TOUGH AND DEPENDABLE, IDEAL FOR MILITARY AND TACTICAL APPLICATIONS. THE PORRO SYSTEM CREATES A REALISTIC THREE-DIMENSIONAL IMAGE, WITH MAXIMUM DEPTH OF FIELD, FOR ACCURATE EVALUATION AND TARGETING. EVEN AT EXTREMELY LONG DISTANCES, THE USER CAN CLEARLY SEE WHETHER ONE OBJECT IS BEHIND OR IN FRONT OF ANOTHER. WITH EXCEPTIONAL LIGHT TRANSMISSION, THE PORRO SYSTEM ALSO PROVIDES ENHANCED CLARITY IN CHALLENGING LOW-LIGHT SITUATIONS.

STEINER RELIABLE.

WORLD-CLASS COMBAT PROVEN COATINGS.

ALL AIR-TO-GLASS SURFACES OF STEINER BINOCULARS AND SCOPES ARE MULTI-COATED WITH PROPRIETARY, CUTTING-EDGE FORMULATIONS OF MINERALS AND RARE EARTH COMPOUNDS THAT MAXIMIZE CLARITY, COLOR AND DEFINITION. AS THE ONLY BRAND THAT HAS DEVELOPED OPTICS SPECIFICALLY FOR MILITARY SERVICE, STEINER IS COMMITTED TO GIVING YOU EVERY POSSIBLE EDGE.

MORE LIGHT, BETTER IMAGE.

The more light through the lenses, the sharper the image—critically important in low-light military situations. Steiner's advanced optics dramatically enhance light transmission, for exceptional clarity in the most challenging conditions. 100% in-house optical capability ensures absolutely consistent, premium lenses and prisms, with world-leading coatings for bright, high-contrast binocular or rifle scope images. Steiner scopes add features like front focal plane and mission-specific, glass-etched illuminated reticles for unmatched accuracy.

BUILT FOR ANYTHING. ANYWHERE. ANYTIME.

STEINER MIL-SPEC BINOCULARS AND SCOPES ARE DESIGNED FOR TRUE BATTLEFIELD CONDITIONS. RUGGED LENS CONSTRUCTION ENSURES STABILITY EVEN UNDER SEVERE SHOCK AND VIBRATION. UNBREAKABLE MAKROLON® BINOCULAR HOUSINGS WITH-STAND OILS, SOLVENTS, HEAT, COLD, SUN AND SALTWATER. ONE-PIECE NITROGEN PRESSURIZED 34MM SCOPE TUBES ARE SHOCKPROOF TO 900 GS. ALL OPTICS ARE FOG-PROOF AND WATERPROOF, SEALED AGAINST DUST, DIRT AND MOISTURE. ALL ARE IMMERSION WATERPROOF, SOME TO DEPTHS OF 33 FEET. DESIGNED WITH SPECIAL FORCES AND EXPERT WEAPONRY INPUT, BUILT TO STRICT MILSPEC DEMANDS, STEINER OPTICS EXCEED THE NEED.

FOG PROOF WATERPROOF N₂ INJECTION™ SYSTEM.

Steiner's proprietary N₂ Injection™ System pressurizes optics with nitrogen and trace helium. If seals are not absolutely tight, hyperbaric testing reveals escaped helium molecules, the optics are disassembled, and the process is repeated. Fail-safe testing with medical-grade tools ensures absolute quality, positive internal pressure, and zero fogging and water intrusion despite drastic changes, severe conditions, and lifetimes of use.

ADVANCED LASER PROTECTION.

Steiner was the first to offer binoculars with laser protection filters. Since our initial research and development, we have gained industry-leading experience and knowledge in this technology, which benefits all military customers. All our military binoculars can be supplied with laser filter protection, either standard filter (OD 4 / 1064 nm) or one meeting the specific user requirements.

ALL TEMPERATURE PERFORMANCE.

Steiner Military binoculars are temperature hardened, impact armored and combat-ready for any theater in the world. Built for operating conditions from -40° to +176° F., they will deliver consistently sharp, clear, fog-free images, from arctic snowfields to desert heat, jungle valleys to mountain peaks. No matter where your duty sends you, no binocular will serve you better.
